OBJECTIVE

Dynamic professional with hands-on experience at Base Titanium Limited, excelling in data interpretation and GIS mapping. Proven ability in multitasking and customer service, demonstrated while retaining clients at Zuku Fiber. Currently supporting vulnerable populations through data collection with the Ministry of Labour, enhancing social protection initiatives.

EXPERIENCE

November – December 2024

Ground Data Collection *Ministry of Labour*

- Collected data for the government on vulnerable people in Embakasi South.
- Supervised the registration process into the Enhanced System Registry under the Social Protection Department.

January – April 2023

Intern Geologist *Base Titanium Limited January – April 2023*

- Gained hands-on experience in mine operations, sample collection, and data interpretation using GIS mapping software.
- Assisted in survey work and lab analysis within the geology section.

November 2022- January 2023

Field Agent *Zuku Fiber*

- Addressed client issues and retained customers as part of the Zuku retention team.
- Reached out to clients who were out of service to resolve their concerns.

June 2022

Geological Mapping *University of Nairobi*

- Mapped the Matuu area in Machakos County, Kenya, as part of a course requirement.
- Created geological and digital maps using QGIS software and generated a comprehensive report on the area's lithology.
